B.E Computer Science (Non-Regular) :

Annai College of Engineering and Technology, Kumbakonam

Diploma in Mechanical Engineering :

Christian Polytechnic College, Oddanchatram. (April 2023)
Percentage : 76.32.

SSLC :

Nadar Committee Higher Secondary School, Ramanathapuram . (March 2020). Percentage : 86.2.

SKILLS

Programming Languages :

Java, SQL, PHP, TypeScript

Web & Backend Technologies :

SpringBoot, JSP, Servlets, Laravel, PHP MVC

Frontend Frameworks :

Angular, ReactJS (Basics), ReactExpo (Basics – Mobile Apps)

Databases :

MySQL, SQLite

Deployment & Hosting :

Hostinger, GreenGeeks (Live project deployment & server setup)

Third-Party Integrations :

Google Login, Email OTP Verification (SMTP), OTP Services, Razorpay Payment Gateway, Shiprocket, Google Maps API

Tools & Others :

Postman (API Testing), Git (Basics), Figma (Basics – UI Design), AutoCAD, MS Office, Google Apps Script, Google Sheets, Docs & Forms, Canva (Designs for posters, resumes, presentations & social media)

LANGUAGES

Speak: Tamil, English, Malayalam Write: Tamil, English

PROFESSIONAL EXPERIENCE

Software Developer

Balkans IT Solutions Pvt. Ltd, Mayiladuthurai :

2 Years

- Working in a team-based environment on web apps, mobile apps, and admin dashboards
- Contributed to hotel management systems, e-commerce platforms, and custom client projects
- Handled backend APIs, database design, and frontend coordination
- Implemented third-party integrations (Payments, OTP, Email, Shipping, Maps)
- Involved in deployment and live production support

Full Stack Developer Intern

Uniq Technologies, Chennai :

6 Months

Gained hands-on experience in Java, Spring Boot, JSP, Servlets, and SQL

Developed web applications with backend–frontend integration

PROJECTS

Single Hotel Management System

Angular | Laravel | SQLite

Room & room-type management, booking flow, pricing logic, admin dashboard.

Multi-Hotel Management System

Angular | Laravel | MySQL

Multi-hotel support with hotel-specific room types, dynamic pricing, scalable booking architecture.

Boutique E-Commerce Application

Angular | Laravel | MySQL

Multi-category ordering (Ready-to-Wear, Stitching, Fabric, Design-to-Wear) with complex order logic.

COMPLEX TECHNICAL CHALLENGES

Multi-Hotel Booking Logic :

- Hotel-wise room type listing, dynamic per-night pricing
- Early checkout, same-day booking & availability recalculation logic

E-Commerce Order Logic

- Single checkout handling multiple categories with different business rules
- Scalable, clean backend controller design
